

Find the stories hiding in your camera roll.

Cur.AI.ted finds the stories buried across thousands of photos and turns them into private collections you can share, revisit together, and pass on.

Private by design.
Your memories stay yours.

Find your story

Use AI to spend less time with AI.

From camera roll to heirloom

Cur.AI.ted does the sorting and story work.
You keep the meaningful choices.

Small chapters become
Memory Folios.

Big chapters become
photo mosaics.

Joy in Motion

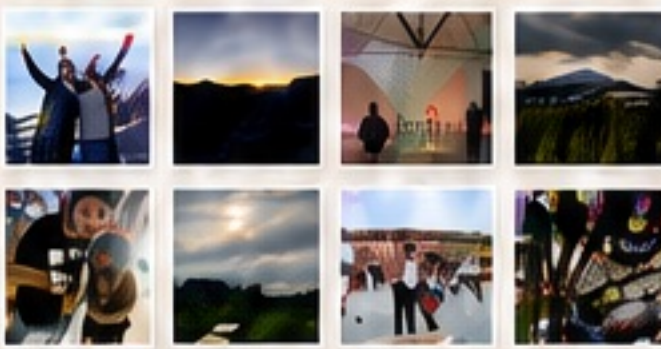

2023

Bright expressions and playful moments carry the celebration from start to finish.

Places We Found

2023

Japan unfolds through the views, landmarks, and streets you explored together.

How Cur.AI.ted works

1

Gather

Add photographs in batches from the devices and folders where they live.

2

Prepare

On-device checks set aside likely duplicates, severe issues, and screenshots.

3

Choose

Confirm the chapter and answer: what do you want to remember?

4

Discover

The curator proposes three grouped stories with hero candidates.

5

Curate

Choose the story, swap the hero, and set aside anything that does not belong.

6

Create

Render a mosaic for a large collection or a Folio for a smaller chapter.

Private by design

Your photographs stay on your device. Originals are never uploaded, changed, or deleted.

Real artifacts

Choose a mosaic proof, a print master, or an 8x10 Memory Folio PDF.

Made from your actual memories

AI finds the story. You keep the meaningful choices.

Your photographs are already a story.
Come find it.
